We believe these products to be the most technically advanced systems in the market for almost any application you might envision.

- **Roll A Door**
- **Fire Door**
- **Existing Door**
- **Automatic Door**
- **Wicked Door**
- **Sliding gate**
- **Aluminium Sliding Door**

## Security Door

---

We are the prominent manufacturer, supplier and trader of Security Door. This Security Door is known for its supreme quality and hassle free performance in various applications.

- **Fire Door**

# **IMPEX** Rolling Shutters & Engg Works

## Rolling Shutter Motor

We are offering Rolling Shutter Motor to our clients. These are designed and manufactured by inculcating advanced tools and technology using optimum quality raw material. These are available in the market at affordable prices.

- **Rolling Shutter Side Motor**
- **Central Motor**
- **Tubular Motor**

## Aluminium Window

### **SERIES 40 HEAVY DUTY ALUMINIUM CASEMENT WINDOWS**

**STATE-OF-THE-ART** - Strong, functional and aesthetic, Series-40 is compatible with the latest fabrication techniques.

**SUPERIOR DESIGN** - Series-40's superior design enables it to withstand wind pressure up to 200 kg/m<sup>2</sup>. Series-40 windows and ventilators also develop less deflection compared to conventional windows.

**UNIQUE CONSTRUCTION** - The corners of frames and shutters are mitre cut on a high speed TCT (Tungsten Carbide Tipped) saw. Frames are then assembled on a proprietary crimping machine designed and developed by INDAL exclusively for this purpose. Sturdy corner cleats hold lite dame together. This gives a square, distortion free and nearly hairline corner joint.

**FULLY WEATHER SEALED** - Series-40 windows and ventilators are fully weather sealed, using high quality and durable EPDM/Neoprene weather seals. These reduce ingress of air and water as well as the escape of interior atmosphere.

**VERSATILE** - These windows can be made to any size. Fitted with stainless steel friction hinges, these can be either simple fixed sash, top hung or side hung casement, or any combination of these, to cater to different needs. The friction hinges give access to the exterior surface of the shutter from inside, facilitating the cleaning of glass panes and shutter frames.

**DOUBLE GLAZING** - The system is versatile enough to accept both single and double glazing units up to 24 mm thick. Double glazing units, incorporating a 12mm airspace, give significantly better thermal and acoustic insulation than most other double glazed windows.

**EASY TO MAINTAIN** - fabricated from robust, purpose made aluminium alloy extrusions (as per IS : 733-1983 and IS : 1285-1975) and anodized according to INDAL's unmatched standards. Series-40 windows require virtual no maintenance except the occasional wipe.
